Batteries 88 Crystalline solids 2,
Binary solutions 35, 43, 46 Dalton's law
Biochemical catalysis 133 Daniell cell
Black phosphorus 181 Denticity
Blast furnace 159, 160, 161 Dependence of rate on concentration
Blister copper 162 Depressants
Body-centred unit 9, 13 Dialyser
Bohr magneton 29, 228 Dialysis
Bonding in metal carbonyls 261 Diamagnetism 30,
Bravais lattices 10 Didentate
Bredig's arc 139 Diode
Brown ring test 180 Dislocation defect
Brownian movement 142 Dispersed phase 136,
Calcination 155, 159 Dispersion medium 136,
Cast iron 160, 161 Dissociation constant
Catalyst 116, 130 Distillation
Cell potential 68 Ebullioscopic constant
Chelate 247 Electrical conductance
Chemical kinetics 95 Electro dialysis
Chemisorption 125 Electrochemical cells
Chiral 252 Electrochemistry
Chromatographic methods 165 Electrode potential 68, 224,
Cis - isomer 252 Electrolytes
Classification of colloids 136 Electrolytic cell
Close-packed structures 14 Electrolytic refining
Coagulation 144 Electromotive force
Colligative properties 49, 58 Electron hole
285 Ir

2020-21

Terms	Page No.	Terms	Page No.
Electron vacancy	28	Inhibitors	134
Electronegativity	172, 187, 199	Inner transition metals	234
Electronic configuration	216	Instability constant	263
Electronic defect	28	Instantaneous rate of a re	action 98, 99
Electroosmosis	144	Insulators	27
Ellingham diagram	157, 158	Inter molecular forces	2
Emulsions	137, 145	Interstitial compounds	230
Enantiomers	252	Interstitial defect	25
End-centred unit	9	Intrinsic semiconductors	27
Enthalpy	126	Ionic conductance	77
Enzyme catalysis	133, 134	Ionic radii	171, 186, 198
Equilibrium constant	73	Ionic solids	5
f block elements	234	Ionisation enthalpy	171, 187, 198, 209
Face centred unit	9, 13	Ionisation isomerism	253
Facial isomer	252	Isolation of elements	149
Faraday's law	85	Isomerism	251
Ferrimagnetism	30	Isotonic solution	56
Ferromagnetism	30, 228	Kinetic energy	115
First order reaction	106, 111	Kohlrausch law	83, 84
Froth floatation	154	Kraft temperature	138
Fractional distillation	174	Lanthanide contraction	219
Frenkel defect	24, 25	Lanthanoids	215
Frequency factor	113	Le Chateliers principle	40, 43
Freundlich isotherm	127	Leaching	154
Fuel cells	90	Lewis acids	247
Galvanic cell	66, 67, 90	Ligand field theory	254
Gangue	153	Ligands	247
Gels	137	Line defects	24
Geometric isomerism	251	Linkage isomerism	253
Giant molecules	5	Liquation	164
Gibbs energy	67, 74, 117	Long range order	2
Haber's process	131	Lyophilic colloids	137
Half-life	110	Lyophobic colloids	137
Hall heroult process	163	Magnetic separation	153
Halogens	197	Meridional isomer	252
Henry's law	41	Metal carbonyls	261
Heterogeneous catalysis	130	Metal excess defect	26
Heteroleptic complex	248	Metallic solids	5
Holme's signals	182		153, 156
_	130	Metallurgy Micelles	133, 136
Homogeneous catalysis Homoleptic complex	248	Minerals	152
	255	Mischmetall	
Hybridisation Hydrate isomerism	253 254	Molal elevation constant	237 51
•	254 224		
Hydraulic weeking		Molar conductivity	39
Hydra matallyrgy	153	Molar conductivity	81
Hydrogen bended melecular solid	163	Molarity	38, 55
Hydrogen bonded molecular solid		Mole fraction	37, 50
Ideal solution	47	Molecularity of a reaction	103
Impurity defect	25	Mond process	165

Chemistry 286

Terms	Page No.	Terms	Page No.
Monoclinic sulphur	192	Secondary battery	89
Mononuclear coordination compounds	249	Secondary valence	244, 245
Nernst equation	72, 73	Semi conductors	27
Noble gases	208	Semipermeable membrane	55
Non-ideal solution	47	Shape-selective catalysis	132
Non-polar molecular solids	4	Short range order	2
Octahedral voids	17, 19	Smoke screens	182
Optical isomerism	252	Solid state	2
Order of a reaction	102	Sols	137
Ores	152	Solubility	39
Osmotic pressure	54	Solvate isomerism	254
Ostwald's process	131	Stereo isomerism	254
Oxidation number	248	Stoichiometric defect	24
Oxidation state	199	Strong field ligands	258
Oxides of nitrogen	177	Structural isomerism	251
Oxoacids of halogens	205	Super cooled liquids	3
Oxoacids of phosphorus	184, 185	Surface chemistry	123
Oxoacids of sulphur	194	Temperature dependence of rate	113
Ozone	191	Tetrahedral permanganate	226
Packing efficiency	20	Tetrahedral voids	16, 18
Paper chromatography	166	Thermodynamics	156
Paramagnetism	29, 227	Trans isomer	251
p-block elements	170	Transition metals	215
Peptization	140	Tyndall cone	141
Physisorption	125	Tyndall effect	141
Pig iron	161	Ultrafiltration	140
Point defects	24	Unidentate	247
Polar molecular solids	© 5 (Unit cells	7, 9
Polydentate	247	Units of rate constant	103
Primary battery	88	Units of rate of a reaction	97
Primary valence	244	Vacancy defect	25
Pseudo first order reaction	112	Valence bond theory	254, 257
Pseudo solids	3	Van arkel method	165
Purification of metal	153	Vapour phase refining	165
Pyrometallurgy	162	Vapour pressure	43, 46
Raoult's law	43, 46	Voltaic cell	66
Rate law	100, 101	Weak field ligands	254
Reaction rate constant	101	Werner's theory	244
Redox couples	67	Wheatstone bridge	75, 78
Red phosphorus	181	White phosphorus	181
Reverberatory furnace	156	Wrought iron	161, 167
Reverse osmosis	57	Zeolites	132, 133
Rhombic sulphur	192	Zero order Reaction	105, 111
Roasting	155, 159	Zeta potential	143
Schottky defect	24, 25	Zone refining	165
